Layer basics Layers are the foundation of all of Photoshop's editing. In image editing, you can work on only the part of an image you want to change. Layers allow you to create multiple layers for the different elements of an image. This makes it easy to do fine-tuning on each individual element while leaving the rest of the image unchanged. Each layer has different colors, brushes, shapes, and text, as well as a fill (or background color) and a transparent background. When you work on a layer, you must make a decision to either leave the layer invisible, reduce its opacity (to see it but don't see the background), or make it visible and fill it with the color you chose. Layers are also able to blend with each other. The type of blending you create is called a layer blend. * The official Photoshop website is www.adobe.com/uk/photoshop. Layers and layers of layers have been at the heart of photo editing since Photoshop's very early days, and if you work in the digital imaging world, you'll probably have used layers for years. You'll need to know how to use Photoshop's basic tools for layer creation, as well as how to work with layers and their attributes, if you want to advance in image composition.

Shopping Cart My Account Social Icons Categories 27 October 2015 Not Since Carrie Hey everyone! Last weekend I had the pleasure to be a part of the Latvian fashion icon Alexandra Kambukas's latest photoshoot. I had my first experience shooting Alexandra in Latvia last year and I was very happy to go back to her. I've learned so much and met such inspiring women working in fashion! One thing I love about this shoot is that Alexandra is never standing still. She's on the move, dancing with the models, doing funny little poses, crawling and sliding - all while smiling. I could really live like this all day, every day. We did mainly two looks - one more casual and another more elegant. You can see all the outfits here on the photo wall. Every photographer has different philosophies, but one thing is sure, you can never get too many pictures of models! You learn so much from the model's expressions and movements. And it's fun having some shots where the model is touching, posing or kissing you all over! As I was saying, you can see the entire gallery on the photo wall on the right. My name is Jelena. I am from Latvia, but nowadays I live in Amsterdam. I started photographing myself when I was about 18 and it wasn't easy for me to be in front of the camera at first. I was a tomboy growing up and it took a lot of time before I started to feel comfortable in front of a camera. Being in a wardrobe is a scary thought, but the way I am now I think it's the most natural thing in the world. It's a lot of fun for me to do photos and meet new people. In fashion I want to inspire and motivate people to be better and try to be happy.
