About This Game

It's Your Life – Where Do You Want to Go?

Spin the wheel and choose your path – the possibilities are endless! Stay single or say “I do”. Retire rich or lose it all. Anything can happen in THE GAME OF LIFE!

Choose your car and take a spin on the winding road of life. Play it safe with sensible choices like college, marriage and kids. Or play it risky with high stakes investments and lavish luxuries. You can even increase your chances of getting rich and winning big with Share the Wealth cards and Life Spaces. Either way, discover what your future holds in colorful, 3-D play. THE GAME OF LIFE has never been better!

Features

- Play the classic game at your own pace
- Choose your avatar and car color
- Live it up in 3-D gameplay
- Compete with up to 6 computer players
- Fun for all ages!

INTERNET CONNECTION REQUIRED FOR ONLINE GAMING. AirLand Battles is pretty much using the same formula as the original but adds a lot more to the gameplay; jets, decks and a lot of factions/units. Great follow up to European Escalation but it's lacking scenarios like the previous had but overall pretty solid game and excellent multiplayer.. goooooooooooooooooo game

play it like a BOSS !!. Excellent game, lovely graphics, great music, bleeds charm. Oh my gosh! Something that looks and feels like Homeworld! I like the way the gameplay and engine is really similar to Homeworld since I can't get enough of it.

Granted it's an indie game, so I wouldn't expect the large funds to develop heavy content that big name games get access to, namely the budget for story writing, cinematography and music, but the game engine is definitely is a good base to start from.

I like the ability to select the next level by choosing unexplored squares, however what I liked less was the fact that these squares are basically a bag of pre-selected random missions which may repeat, which by half-time you would already have the maximum fleet. If the goal was to make this replayable, the game can be made to be harder by having more level variations and rewards, and the path to the goal shorter, so a player will need to replay multiple times to be able to encounter all reward/level combinations. (look at FTL for the great use of replayability mechanics) Missions could be varied and limited to utilize only a few ships, for example.

And to make it really playable, it'd be nice to have mini-RPG elements like Star Control I (one) where the amount of territory you control can increase your supply lines, for example, so the player can bring forward more ships. So my suggestion for immersion would be less RTS (ie. disable the infinite ability of building fleets just from mining resources, ships in real life takes years to build), make it more RPG where you can fix your ships from resources but not build entire new ones unless you get it in a mission, but that's just me :)

I know this now sounds more like a suggestion thread instead of a review, so it'd be nice to have a forum in your website to solicit feedback and for players to post their stories, since this engine is really ripe to be used to tell great stories, so don't settle for a Homeworld clone, get some great stories out there for your game to tell.

This is a great idle game. Set up your team and watch them decimate the dungeons and arenas! I have a mere 211 hours on the mobile app, but that is enough time to reach the end of the content and work on the best strategies for team/Item comps.

So far the PC port is a great adaptation. It captures all the charm of the original on a much larger screen. Leave it running as you do other activities and check in later. Thank you Afro and Pox for continuing to support this, and I am looking forward to SD2!. I wish I could like this game. Really... I mean, the gameplay went through some improvements. But the dialogues... the plot. I hate it thoroughly. It's okay to make references to something once in a while but let this be said. You can NOT - I repeat - YOU CAN NOT - make a game entirely out of references. And this is what this game seems to be. A force-funny remake of Lord of the Rings. If you copy at least make it nice afterwards and do not pretend to have made it bad on purpose. I have counted SIX tauntingly bad LotR referals in the first two levels and this obnoxiously unfunny♥♥♥♥♥♥of a "sidekick" does not improve the situation with his horrible voice and ability to point out the obvious.

I managed to get used to the playstyle and it's better in the "The Dark Lord" version, compared to the normal game. It's a good game.

I want to keep ranting but I'll run out of letters soon.

Gameplay: Good, enjoyable

Dialogues, story, jokes: "Line up and shoot"-tier.

(also: game <3 crashing). \u2665\u2665\u2665\u2665\u2665iest \u2665\u2665\u2665\u2665ing game of my life. This is a fairily easy puzzle/hidden object story driven adventure. The voice acting was excellent as was the rest of the sound track. It reminded me of a Disney type adventure. It is definitely geared towards young girls, but could be enjoyed by anyone looking for an easy way to spend some clicky time. I played this with my daughter and we had a blast solving the puzzles and going through the story. We finished it in one sitting. The hidden object parts were VERY easy, so keep in mind there will be little challenge for an adult playing this. The other puzzles got to be a bit much for my daughter so I had to step in now and then and click thorough a puzzle here and there. Overall an enjoyable experience.. Game need more UI Elements and more Info for Quest. Maybe Respawn of Zombie is to much :). Quite simply brilliant.

Motion sickness issues in the early days are fixed with some comfort settings, I only needed the most minor one, and get sick quite easily.

So gutted that I've bought this game just a few weeks before I have to throw all my belongings in a shipping container that I wont see again for another 12 weeks!!!

Battlezone is a complete and perfectly polished game, an example of what a triple A development studio can do with VR.
